Recommendations on Traffic and Crowd Management for Events

Requirements, Standards and Options for Action for Consideration in the Planning, Approval Processes and Putting on of Events

Edition: 2022 | Translation 2024

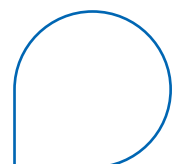

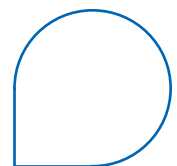

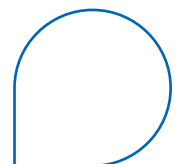

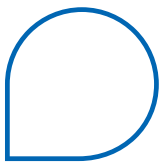

Table of contents

	Page
Table of contents	3
1 Preface	7
2 Introduction	8
2.1 Purpose	8
2.2 Contents of the Recommendations on Traffic and Crowd Management for Events (EVC)	9
2.2.1 Traffic and crowd management	9
2.2.2 Traffic facilities	9
2.2.3 Individual topics covered	10
2.2.4 Criteria for incorporating individual topics	10
2.3 Area of application and differentiation from other tasks when preparing and putting on an event	10
3 Legal basis for traffic and crowd management for events ...	13
3.1 Introduction	13
3.2 General duty of safety	13
3.3 Relevant laws and regulations in the context of traffic and crowd management of an event	13
3.3.1 Regulations under private law	13
3.3.2 Regulations under public law	14
3.3.3 Labour Protection Law regulations	15
3.3.4 Criminally relevant provisions; administrative offences	15
3.3.5 Technical regulations	15
3.4 Relevant duties to obtain permits for traffic and crowd management	15
3.5 Recommendations for dealing with legal bases within the context of traffic and crowd management at an event	18
3.6 Recommendations for the organisation of planning and approval procedures with traffic and crowd management contents	18
3.6.1 Responsibilities	18
3.6.2 Procedure	19
3.7 System-inherent risks	20
4 Volume of traffic and people	21
4.1 Initial conceptual design	21
4.2 Forecasting the number of people arriving, departing and attending the event in time intervals	21
4.3 Forecasting and influencing the modal split of people arriving and departing	22
4.4 Demand of normal traffic	25
4.5 Estimating and presenting demand as a basis for planning ...	25

	Page
5 Moving and standing motorised traffic	26
5.1 Moving motorised traffic	26
5.1.1 Testing, planning and implementing measures in the road network	26
5.1.2 Signposting	29
5.1.3 Traffic control	30
5.2 Safety management for the road infrastructure	31
5.3 Parking facility management	31
5.3.1 Designing the available parking facilities	31
5.3.2 Entrances and exits to and from parking areas, including check in and control	35
5.3.3 Parking guidance systems	36
5.4 Special traffic and special parking prioritisations	37
5.5 Delivery traffic and traffic of public safety authorities and organisations (BOS)	37
5.6 Protection of local residents	40
6 Public transport, shuttle bus, coach and taxi services	41
6.1 Public transport services	41
6.1.1 Basic principles	41
6.1.2 Integrated traffic control centre	42
6.1.3 Ensuring a high ratio of public transport	42
6.1.4 Public transport capacities	43
6.1.5 Train stations and stops	45
6.2 Shuttle transport services	46
6.3 Coach traffic	46
6.4 Taxi services	47
7 Bicycle traffic	48
7.1 Arrival and departure traffic routes	48
7.2 Signposting/traffic control	48
7.3 Bike racks	48
7.3.1 Choice of location	48
7.3.2 Structural design	48
7.4 Organisation	49
8 Planning for and controlling crowds of people	50
8.1 Fields of action	50
8.2 General procedures for designing and inspecting facilities for crowds of people and for managing crowd flows	50
8.3 Special procedures for designing individual areas	56
8.3.1 Preliminary notes	56
8.3.2 Pedestrian routes for arrival, attendance and departure	57
8.3.3 Entrances and exits, including security search points	58
8.3.4 Waiting zones in front of the entrances/exits	61
8.3.5 Public areas	63

	Page
9 Monitoring, assessment and control of crowds of people arriving at, departing from and attending an event	67
9.1 Recognising a potential danger and hazard assessment	67
9.2 Measures to eliminate or minimise hazards	69
9.3 Documentation and follow-up	71
10 Safe evacuation as part of the management of disruptions and hazardous events	72
10.1 Object of consideration	72
10.2 Identification of relevant evacuation scenarios	72
10.2.1 Categories for determining the characteristic properties ..	73
10.2.2 Risks and hazards	73
10.2.3 Determining the relevant evacuation scenarios	74
10.3 Proof of adequate assessment of escape routes	74
10.4 Organisational measures	75
11 Regulations, laws, ordinances and literature	77
11.1 Codes of practice	77
11.2 Laws and regulations	78
11.3 Literature	78
12 Directories	80
12.1 List of figures	80
12.2 List of tables	84
12.3 List of abbreviations	84
13 Terms	85
13.1 Terms according to the definitions of the FGSV	85
13.2 Additional terms used in these recommendations	87
Annexes	89
Annex A: Checklist for basic evaluation	90
Annex B: To-do lists	95
Annex C: Real and notional examples and experiences for the planning and realisation of events	108
Annex D: Interrelationships between densities, speeds and volume of traffic of motor vehicle and pedestrian traffic	154
Annex E: Procedure for the design of pedestrian routes and verification of the quality of traffic on pedestrian routes on arrival and departure and in dynamically used public areas	160
Annex F: Scenarios, special requirements and possible solutions or measures	166
